

## Waterproof Adhesive **Bordered Foam**

### **Advanced, waterproof protection**

This foam dressing helps to maintain a moist healing environment, optimal for many different wound types. It can absorb 10+ times its weight as it draws exudate from the wound. The self-adhesive border requires no secondary dressing and can be used under compression bandages. The waterproof barrier seals the wound area and protects from external debris and bacteria.

### **Usage**

For moderate to heavily exuding wounds including but not limited to:

- Venous ulcers (leg ulcers)
- II-IV Bedsores
- Diabetic foot ulcers
- Donor site wounds
- Abrasion wounds
- Operative incisions
